FEATURES

FERTI MIX PLUS is a systemic product with a high concentration of **chelated microelements** in a well-balanced ratio according to the specific needs of greenhouse horticultural crops, fruit, flower and industrial open field.

This product is especially designed for use in all crops where there is a need to prevent and treat apparent or suspected deficiencies of one or more micro-nutrients.

FERTI MIX PLUS is enriched with **Magnesium (4.5%)**, making it ideal for preventing and treating typical deficiencies with the intake of this important element.

FERTI MIX PLUS is an excellent choice for achieving high yields in both protected areas and open fields.
