FEATURES

ENNE SPRINT 24 and CEREAL SPRINT are liquid organo-mineral fertilisers with high nitrogen content, specifically designed to supply plants with the macro element in its various forms and fractions. Thanks to these characteristics, they are ideal for improving the quality and quantity of all crops that require high percentages of them (wheat, corn, soy, rape, sunflower, alfalfa, fruit crops, leafy and cut vegetables, aromatic herbs, Turfgrass, golf courses, etc.).

ENNE SPRINT 24 is more ideal for root applications.

CEREAL SPRINT is ideal for foliar and root applications.
