FEATURES

BORDO *FERT* 13 TRIO WP and **BORDO *FERT* 20 ZEO WP** are ideal fertilisers for foliar application, containing Boron **(B), Copper (Cu)** (sulphate + hydroxide), Iron **(Fe)**, Tannins and Zeolitic Inert from natural origin; they **nourish and strengthen the crops**. These products are designed to prevent and resolve typical pathologies caused by deficiencies in the trace elements they contain.

The copper contained at **13%** in **BORDO *FERT* 13 TRIO WP** and **20% in BORDO *FERT* 20 ZEO WP** plays an important role as it is involved in oxidation-reduction reactions that occur during **metabolic processes** and is part of antioxidant enzymes such as **ferroxidase, which is essential for iron transport in plants.**
The cupric forms contained in the two products **bind 70-80%** of the minerals (silicates, carbonates, K, P, Mg, Fe, Mn, Al) present in the Zeolite; the bound part persists for a long time on the leaves. Unalloyed copper, on the other hand, is immediately available.

The presence of boron helps prevent millerandage in vines, poor fruit setting in olives, fruit and vegetables, fruit suberosity (pear and apple), hollow heart in beets and shortening of internodes.
